

SENTINEL

PRIVACY · GUARDIAN

[Skip](#)

Scan your network for hidden eyes

Sentinel inspects every device on your Wi-Fi and flags anything that looks like a camera — even ones that hide behind custom hostnames.

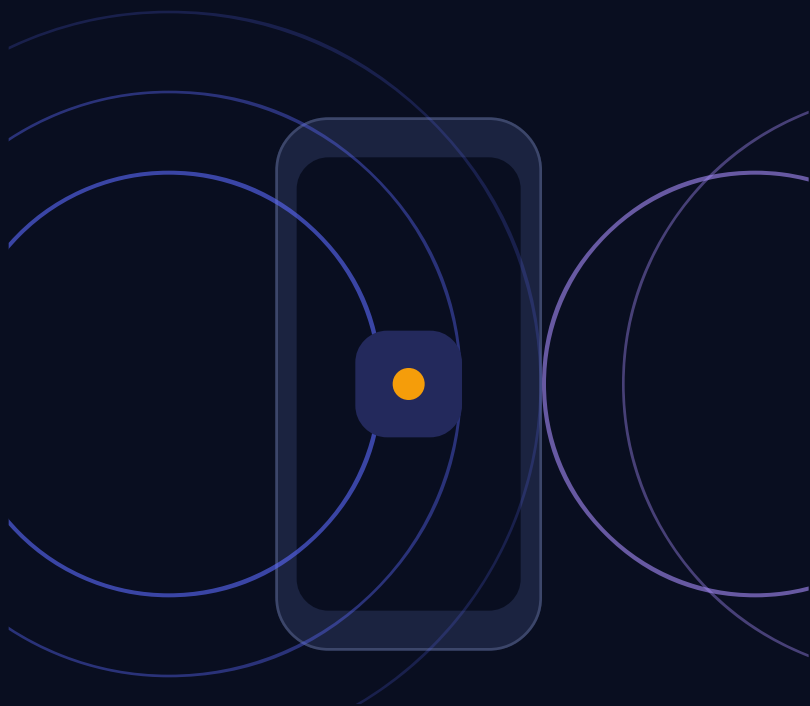

[Next](#)

[Skip](#)

Spot infrared lenses in the dark

Switch camera filters to reveal hidden IR LEDs that glow in your hotel room, AirBnB, or changing room.

[Next](#)

Feel magnetic whispers nearby

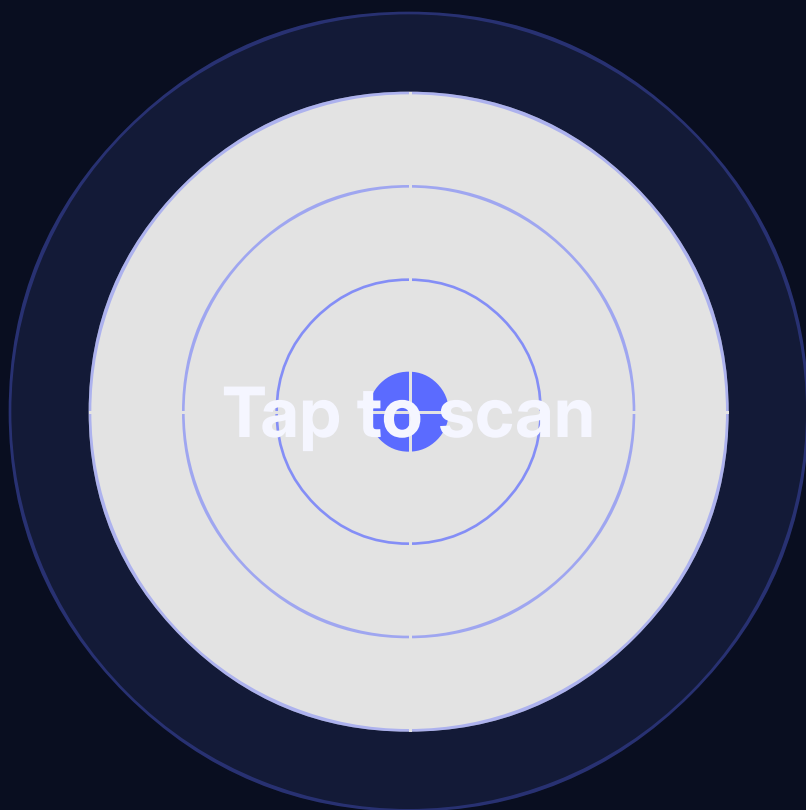

Powered by your phone's magnetometer,
Sentinel feels the tell-tale buzz of a camera
lens motor — even when Wi-Fi is off.

FEATURES

Safety Tips

3 quick playbooks

Tap to expand each scenario

At home & rentals

Inspect power sockets, mirrors (especially one-way glass), smoke detectors, lamp holders, ceilings, and keyholes. Wires running along walls can signal a hidden camera power line.

Hotels & guesthouses

AC units, lampshades, ceilings, vanity mirrors, smoke sensors, vases, sockets, and TV racks all face the bed — sweep them with Sentinel IR Scanner before settling in.

Self-prevention habits

Cover your laptop webcam, run Sentinel weekly, lock your router admin page, and avoid public Wi-Fi for sensitive logins.

Sentinel Pro

Your private guardian, every day
